Vrta sa vždy do vnútornej plochy dverí (pri zatvorených dverách túto plochu nevidíte).

Nikdy nevrtajte do vonkajšej, t.j. pohľadovej plochy dverí.

Pri vrtaní otvorov pre skrutky na úchytky prosím pritlačte z opačnej strany dverí drevenú podložku.

Používajte len ostrý a len taký vrták, ktorého celková dĺžka neprekračuje celkovú hrúbku dverí spolu s drevenou podložkou.

Buďte opatrný, aby ste sa nezranili !

Es wird immer nur in die Innenfläche der Türen gebohrt (bei den zugemachten Türen siehe diese Fläche nicht).

Bohren Sie niemals in die äußere, d.h. Sichtfläche der Türen.

Bei der Bohrung der Löcher für die Griffe drücken Sie aus der Gegenseite der Türen einen Holzauflage.

Verwenden Sie nur einen scharfen und solchen Bohrer, dessen Gesamtlänge nicht die Gesamtstärke der Türen zusammen mit Holzauflage überschreitet.

Seien Sie vorsichtig, damit Sie sich nicht verletzen !

You have to drill always the door from back side. Never drill into front side of door. Please, by drilling the holes for handles, press wooden base on back side. Use sharp drill, with length, which is less then depth of front and wooden base. Be carefull, dont injure.
